**FREIGHT
AFRICA** 

Today's global and volatile shipping industry requires a professional approach.

Freight Africa nv was established in February 1993 and has acquired an important market share in the clearing and freight forwarding industry in East, Central and Southern Africa.

Our longstanding expertise and international network are geared towards offering our customers an intermodal door-to-door freight forwarding package for containerized and conventional commercial shipments as well as for project cargoes and large parcels of aid cargoes to and from the following African countries:

Tanzania, Kenya, Uganda, South Sudan, D.R. of Congo, Rwanda, Burundi, Zambia, Malawi, Zimbabwe, Mozambique, Angola & South Africa.

Freight Africa nv can, of course, also provide for freight forwarding services on a port-to-port and port-to-door basis.

Through a permanent exchange of market-related data with our own offices and agencies in the transit and destination countries as well as at the main border posts, we are always in a position to recommend to our customers - comprising trading and industrial companies, NGO's, international aid organizations, shipping companies and forwarding agents - the most suitable transit corridor, taking into account speed, safety, price and customer's preference.

Our focus

Our aim is to assist our customers to remain focused on their core business. To help them to achieve this, an accurate monitoring of their shipments is ensured from the moment the order is ready for shipment until the goods are delivered to their final destination. Tracking reports are provided to our customers on a regular basis in accordance with their personal requirements.

Working pro-actively on a daily basis we can already anticipate on possible hick-ups and safeguard our clients from delays and related additional costs in receiving their cargoes. We are also protecting our clients' interests by carefully selecting the shipping lines not only on basis of lowest tariff but also considering other technical parameters such as reliable shipping schedules, transit time and container release conditions at both the departure and destination ports. Today's global and volatile shipping industry requires a professional approach. That is what Freight Africa nv stands for.

Transit corridors

All routes and rate alternatives are being considered so to offer our customers the most appropriate freight forwarding options. The main African corridors actively used comprise the following African ports:

Dar Es Salaam, Tanzania: serving destinations in Tanzania, Rwanda, Burundi, Malawi, Zambia, Uganda and the D.R. of Congo

Mombasa, Kenya: serving destinations in Kenya, Uganda, Rwanda, South Sudan, Burundi and the D.R. of Congo

Beira, Mozambique: serving destinations in Mozambique, Zimbabwe, Malawi, Zambia and the D.R. of Congo

Durban, South Africa: serving destinations in South Africa, Zimbabwe, Zambia, Malawi and the D.R. of Congo

Walvis Bay, Namibia: serving destinations in Zimbabwe, Zambia, Malawi and the D.R. of Congo

Matadi, D.R. of Congo: serving Kinshasa and its hinterlands

The African network

We have established a fully-fledged network of owned offices and appointed agents in various countries and at all main border posts enabling us to ensure an accurate monitoring of all cargo flows from arrival at the port of discharge right up to the, mostly landlocked, final destination.

The non-African network

Through an extensive network of agents and excellent relations with the major shipping lines, we are in the position to offer intercontinental and intermodal door-to-door freight forwarding services. The most frequent non-African regions we are active in include:

The Far East:

China, Thailand, Taiwan, Malaysia, Indonesia, South-Korea, Japan

The Middle East: India, United Arab Emirates (Dubai), Egypt, Pakistan.

Europe: France, Belgium, The Netherlands, Germany, Italy, Spain, all Scandinavian and Eastern European countries.

USA and Canada

Documentation

In addition to our general freight forwarding activities, we also assist our customers with particular services such as but not limited to the issuance of waivers (ECTN, BESC, FERIL) and cargo insurance coverage formulas.

Being a fully licensed contracting freight forwarder we are entitled to issue our own Bill of Lading covering intermodal door-to-door freight forwarding solutions. This Bill of Lading is a fully negotiable document being endorsed by the international banking world.

As a member of the Antwerp Freight Forwarding and Logistic Association we are also entitled to issue our own Fiata documentation.
